

EZEKIEL KIBIEGO

SOFTWARE DEVELOPER

Nairobi, Kenya

+254722991833

kibiezekiel@gmail.com

SKILLS

- Proficient in Python, Django, Flask, Java, Spring Boot, Apache Camel, JavaScript, React and Angular.
- Strong knowledge of DevOps practices and tools, including Jenkins, Docker, Ansible, Maven, Gradle, OpenShift and Kubernetes.
- Experience with API gateway development using WSO2, Integration Studio, OpenAPI.
- Excellent with SQL Relational Databases such as PostgreSQL, MySQL and Oracle.
- Proficient in cloud computing with Google Cloud, AWS and Microsoft Azure platforms.
- Skilled with scripting with Bash and Python.
- Experience working on Linux and Windows based infrastructure.
- Excellent analytical and problem-solving.

COURSES AND CERTIFICATIONS

- Advanced Java, LinkedIn Learning, Feb 2023 [Credential URL](#)
- SQL, LinkedIn Learning, Feb 2023 [Credential URL](#)
- WSO2 MI, Udemy, November 2022 [Credential URL](#)
- Computer Networking, Udemy, October 2022 [Credential URL](#)
- Kubernetes, Udemy, October 2022 [Credential URL](#)
- Microservices with Spring Boot and Spring Cloud, Udemy, August 2022 [Credential URL](#)

PROFESSIONAL SUMMARY

Experienced software developer with a passion for creating innovative and efficient software solutions. Strong technical skills in Java, Spring Boot, Apache Camel, Python, Django, Flask, JavaScript, React and Angular as well as extensive experience in API gateway with WSO2, DevOps with Jenkins, Docker, and Kubernetes. Committed to delivering high-quality results and continuous learning.

WORK EXPERIENCE

Back-End Developer, Codekazi

July 2022 – Present

- Working with a team responsible for developing Python-based financial management software.
- Developing REST APIs using Django to enable integration with third-party services.
- Participated in code reviews and provided constructive feedback to other team members.

Software Development Technical Mentor, Chaptr Global

Feb 2023 – Present

- Training and mentoring software developers.
- Developing and delivering training programs to help software developers stay up-to-date with the latest technologies, software development methodologies, and best practices.
- Assessing the skills of software developers to identify areas where they need improvement, including providing individualized training and guidance to improve their skills and knowledge.
- Creating technical documentation, such as manuals, guides, and tutorials.
- Providing technical support to software developers.

Integration Engineer, Bring Global

Apr 2022 – Jan 2023

- Assisted in the integration of microservices using Spring Boot and Apache Camel, resulting in a more efficient and streamlined application architecture.
- Deployed DevOps architecture utilizing Jenkins, docker, and kubernetes to automate builds, testing, and deployment processes.
- Designed and built API Gateway solutions using WSO2 to manage access to microservices and improve security and performance.
- Collaborated with cross-functional teams to ensure successful integration of microservices into the overall application architecture.
- Worked with senior Integration Consultants to learn best practices and techniques for developing microservices and API gateways.
- Conducted testing and debugging to identify and resolve integration issues and improve code quality.
- Participated in code reviews to gain feedback on coding style and best practices.
- Utilized Agile methodologies to manage project timelines and meet project delivery deadlines.

EDUCATION

Software Engineering, Moringa

Feb 2022, Nairobi, Kenya

- Computer Science Fundamentals.
- Object-Oriented Programming.
- Database Systems and Design.
- Data Structures and Algorithms.
- Software Engineering and Design Patterns.
- Web Development and Front-End Technologies.
- Cloud Computing and Distributed Systems.
- Operating Systems(Linux and Windows) and Networking.
- Project Management, Scrum and Agile Methodologies.
- Human-Computer Interaction and User Experience Design.
